We copy below an article from the Potosi, Gravi Co. Republican, in order to correct misajjusticustics which may arise from its statements. We can use no possible motive which the Repubfoun est have in micrepresenting the facts in the see, and therefore suppose that is mistaken,-The statements, however, are none the less un the and some of them unjust and ungenerous: Southern Wisconsin and Milwankee & Mississippi Railroads.

Mississippi Railroads.

A mosting of the Directors of the Southern Visconsin Railroad Company, was held in Junes and the afternoon of Thursday the 20th institute of the afternoon of Thursday the 20th institute from the former place, as follows:

A correspondent of the Milwaukee Wisconsin, and from the former place, as follows:

If an unable to "speak from the book" of the acts, but will venture to predict that their actors will result in a union with the M. & M. Railroad Co. The business men of this city seem satisfied that this is their true policy."

It appears to us, that the romagers of the M. & M. Railroad are at a great loss to know the extitution of the most profitable terminus of a Maniroad from Milwaukee to the Mississippi River. A few years ugo, the citizens of Polesi got the Polesi & Didgerille R. R. Charteri, granted to the Legislature, for the purpose of a roud from the place to Dodgerille, where it was to some with that coming from Milwaukee; but most feet the building of it, then our Eastern ficudate for the make the connection, and determined appoint stakes the connection, and determined appoint stake of the part of the months since that the refused to make the connection, and determines to teaching some other point than this their termines (1, 1tis only a few months since that the access pers heraided, with no small display, that the contract had been taken for the forthwith completion of the M. & M. Railroad from Male to the forthwith the College has possible some the on to Prairie du Chien; but now, it seems, the contractor has receded from his engagements--o

contractor has receded from his engagements—or else there never were any. (2)

However, in the meantime, the citizens of Green La-Fayette and Grant Counties, were determined upon having a rail road pass through or near their principal towns, enroute from Janesville to the Mississippi, and to this end had undesefficient headway to guarranty the early building of the road, which was entitled the Southern Wissonsin. Now, as will be seen from the notice of a needing of the Directors, the M. & M. and S. W. Railroads have consolidated, so that only one of them will be built; where the Mississippi termines of that will be, we don't know—nor do we believe any one knows within twenty-five unless of it.(3) ty-five unles of it. (3)

(1) It is very probable that "the managers of ise M. & M. R. R. do not know the most profitsble terminus of a railroad honce to the Mis issip-Id;" and it is nothing very remarkable that such should be the case. In order to reach a solution of the difficulty, they propose, by their own line to Prairie do Chien, and by a friendly connection with the Southern Wisconsin R. R to touch the Great Eiver at two points. Thus they, in common with all others interested, will be able to ascertain which is the most profitable terminus.-The two being a wide distance apart, and in no with microforing with each other, the comparison wal be a fair one.
The M. & M. R. R. or the people of this city,

have sever for an instant refused to "make connection" with Railroads through the South Western counties; on the contrary, for the last two your they have constantly and perseveringly tried to obtain such connection; and have been prevented by the votes of members from those count the good old time came again, when the farmer zire. Wast prompted those votes, we do not care to say, for we shall not allow ourselves to include 22 8: V recriminations. Having through all time fibre for the Flax Mill in the neighborhood; and ine believed that better judgment would rule or hat and now finding our anticipations realized, What could give a farmer's daughter more credit was to look only moon what we believe is a great time coming specality for our so thwestern friends as well as for us.

2. The contract was made, and with a responable party, for the completion of the M. &. M. 21 P. to Prairie du Chien, but that contract has en rescinded, on terms inniunity satisfactory, and for reasons satisfactory to both parties, but get by any means because the Company has any you of abendoning that line. This has been so witer stated that there is no possible excuse for

at y mostake about it. The "M. & M. and S. W. Railroads have" a seriousidisted so that only one of them will be thank there is no proper foundation for any voca statement. The Southern Wisconsin Co. with a route rousing southwardly, having heretofore talked of a broad & feet guage, so that it could not connect with any toad leading hither, s new ready to change its proposed guage so that. .: can so connect; and in consideration of this Sciota House, in Columbus, and presented a rethe M. & M. We think they will pay, and we look for earnest work on the part of the managers of both roads, and a hearty cooperation on the part et the people of Grant County. We do not suppose that any one does know what the termiand of the Southern Wisconsin R.R. will be; and some ugly demonstrations have been made we are not in the secrets of the surveyors of that of their feelings towards the Wards, their counsel Company; but we believe that Dubuque, from ris location and western connections is the best 7000) was held at the Court House, at which reone, as we are now advised. Scizure of a Steamer ..

The Canadian Steamer Ottowa, Capt. McGrath, ntered our post yesterday morning, having on board some 80 tons railroad iron, from Prescott,

sworn manifest of her cargo at the port of entry -prescribes the form of the manifest-and foreits the vessel for a violation of the law. The aptain of the Ottawa pleads ignorance of the law, and as there is no kind of suspicion of any inended wrong, it is hoped that she will be allowed o proceed, after discharging the iron, it being part of a large lot which the owners desire to bond here.

We understand that many of the captains of ropellers and sail craft complain of the course taken by our Collector, in requiring an accurate manifest at entry and clearance. This law is as lear as the one referred to above. Sec. 18 of the aws of Feb. 18, 1793, directs that all vessels plyng between ports in the same district, and from parts in one district to those in another, shall reort a manifest of their cargoes, under a penalty of \$20; and if they have on board articles not he growth of the U.S., such articles are forfeitd. Such is the peril which captains, clerks and

owners choose to run, for the sake of avoiding ten minutes' work during the course of a trip. Steamers and propellers come around from Buffalo with valuable cargoes, without any manifest at all, or with one merely stating that they have on so many "tons" or "packages" merchardize. The Collector's duty is to Lnow what is brough

o or cleared from this port, and the most convement way (for the vessels) for him to know it, is for them to furnish the information.

It is said that Collectors at other ports do not require these things, and judging from the fact that so many boats and vessels onter here without manifests, we think it quite probable. But this only shows that they and not our Collector, are doing wrong.

Annual Statements of Exports and Imports are required by Government, we believe, from the various districts; at all events, Government

Messes. Editors: I will mention one or two additional reasons why Farmers should sow Flax Seed. The soil and climate of this State are well adapted to Flex ulture, and it will pay. This State consumes nually fifty or sixty thousand dollars' worth of Linseed Oil, and the amount is yearly increasing. Until the last year most of it was imported from ther States, and our State has been the poorer to that amount. We ought to export rather than import Linseed Oil. A judicious farmer will raise a variety of crops, and not depend upon one alone. The wheat may fail, by reason of bad seed, unskilful hasbandry, or unfavorable seasons. But if he has a few acres sowed in Flax, he may still be sure of the wherewithal to pay

axes and food and clothe his little ones. Flax should be sowed on good, rich soil, and nay advantageously follow Corn, or Potatoes .-One bushel to one and a quarter per acre is the ight quantity to sow; if raised for the seed only, it can be cradled; but if raised both for seed and fibre, it should be pulled. I should like to see will grow his own flax and manufacture his own linen, or least raise the material and prepare the his sons and daughters will emulate his example. for industry and ingenuity, than to see her, with her own hands, provide the lines for her set out? Would she not be considered a price worth having, in these degenerate days?

Milwaukee, May 4th. Burgiary and Murder of a Police Of-

Numerous burglaries were committed in Newark and Zanesville, Ohio, last week, and a large amount of valuable goods carried off to a Hailroad Station, 6 miles from Newark. Officers went to the station and seized the goods, arresting one of two suspicious characters. The other one draw a revolver, and was allowed to pass through and out of the cars, while under way, and he cacaped by springing off the cars when going at great speed, being considerably hurt. Officers went on his track next day, among them being a police officer of Columbus, named Beebe, -Jones, the escaped, burglar, was found at the volver, and threatened to put a ball through the heart of any man that laid hands on him. So strying, he made a run for the hall stairs, backing off all in his way, except officer Beebe, who evolutely sprang forward and caught the scoundrel by the skirts of his coat; Jones, without turning round, fired his revolver over his shoulder at his pursuer, and shot him, the ball enteriog the side of the head and lodging near the opposite ear,

Beebe fell, as dead, and Jones, though shot at six times, and probably wounded, got out of the house and gained a swamp before he could be overtaken,

ASTOUNDING ACTS OF CRUELTY,—A short time since, a fire occurred in the eastern section of the city, and when the firemen entered the house, they found a young lady tied in the garret, and bearing the marks of improper chastisement. It is stated that she had been kept in that condition for some three or four weeks, and with scarcely a sufficiency of food to sustain life. This course of treatment was inflicted by the mother of the young lady, but from what cause, or for what reson, has not transpired. A soon as she was discovered and loosed from her prison house, she escaped and sought refuge in the house of a paternal uncle, residing in the western section of the city, where she has since remained. And there was another found in the house, in the person of a colored servant girl, who had received the pmost tarbarous treatment at the hands at the same woman. The father of the young lady who is alleged to have suffered such cruel treatment at the bands of her mother, is, from the necessity of his business, absent a greater part of his time, and is said to be ignorant of the facts as they exist, nor was any of his family cognizant of it, until a refuge was sought at the house of the under alluded to.

The family has heretofore occupied a responsible position in society, and no suspicion was excited until the young lady was discovered manacled in her prison house. This course of treatment was pursued for some time before its discovery, but the excessive fear in which the rictim was held, prevented her from divulging it to any one, lest, as she thought, her life might pay the forfeit of such disclosure. The whole facts in the case are said to be known to some who are high in authority in the city, but as yet no legal steps are said to be known to some who are high mathority in the city, but as yet no legal; steps have been taken leading to an investigation. It is said, however, that nothing will be done until the return of the father of the young lady, who is to be informed of all the facts connected with this to be informed to all the facts connected with this most cruel and barbarous treatment towards his daughter.-Boltimore American.

SPEECH OF MR. HUNT ON THE NEBRASES BILL. SEPECH OF AR, HOM ON THE APERAGES BILL.

We are glad to observe that the speech of our Representative in Compress, the Hon. T. G. Hunt, in opposition to the Nebraska bill, is receiving encominus in every quarter, The Louisville (Ky.)

Journal, which publishes the speech entire, says

Journal, which publishes the speech entire, says of it:

"It is truly a noble production, and richly deserves all the encomiums it has received. It is equally admirable for its ability, for its sorupulous and lofty tone, and for its chaste yet stirring and fervid eloquence. Its influence upon southern sentiment cannot fail to be extensive and salutary. There can be no doubt, we think, that the Nebraska bill is doomed. A few more such marrly and high-souled efforts from the South as this of the eloquent and chivalreus flunt will render its repose in the 'tomb of the 'Capulets' as sweet and eternal as the sleep of Juliet."

A SPLENDIN Bare.—Mr. Jas. A. Baket has now on the stocks at his ship yard, at the foot of West First st., a magnificent vessel of the largest dimentions that can pass through the Welland Canal. She is about 400 tons burden and measures 142 feet in length, 26 ft. breadth of beam, and 11 ft. hold; and will carry 15,000 bus, of wheat through the canal at the present depth of water. She is said to be the most perfect built vessel that has been launched in this city, having all the latest improvements, among which is what is called a "Boston steerer," and one of Talcott & Undertill'e patent Mississippi Capetans. She belongs to our enterprising fellow sifter, H. C. Wright, Esq., and will probably be launched on Saturday, if the weather is fair. She is to be called the Great-West.—Orzego Pal,

Eleazer Wintasts; and here it is well known that to him the pretended Dauphin—who can neither speak fluently nor write correctly the mother tongue of the gay and brilliant nation over which he claims to have been born sovereign—is indubted for whatever literary reputation he has managed to obtain abroad—at home he has none. Letters, referring to translations he was ongaged in making for Mr. Williams at the time they were written, werein the memorandum-book of the deceased, carefully folded up and preserved with other papers of trifling importance or interest. It is ed, carefully folded up and preserved with other papers of trifling importance or interest. It is certainly a very suspicious circumstance, nevertheless it actually exists in the form of a stubborn fact, that the man who would so well like to be considered the deeply wronged but lineal inheritor of the splendid throve of St. Louis—on which his importal ancestors sat for a thousand successive years—the descendant of a hundred kings and as many Cmants—should owe most if not all, his character for talent and learning to the goints and send acquirements of the unfortunate and trakaown his character for talent and parning to the genue and acquirements of the unfortunate and unknown foreigner whose remains stranger hands commit-ted to a nameless grave last Subbath afternoon, in the neglected cemetery occloated to the wander-ing soldier's last repose, and whose melanchely end we have thus recorded. The Milwaukee Sentinel has said that the Free Press, is opposed to "Land Grants to private corporations." The Standard, which, without the least authority, assumes the false title of Officers.

Sec. 14 (the last) repeals the law of March 12th, e881, to restrain sale of spiritness liquots, and the law known as the Township Liquot Law of last session, with a saving clause in favor of pending prosecutions under the law so repealed.

The Railroad Swindlers.

The political gamblers have not given over their scheme of procuring the passage of a bill through Congress to douate lands to the Valley and other contemplated Roads in Wisconsin. They know they cannot swindle the English out of any more Iron; so they are determined to grab the Government Lands. Rather than that a solitary foot of the Public Domain in this State should be given to Railroad or other Corporations, we would prefer not to have a Railroad built in 20 years. Such is the santiment of the mass. But all necessary Roads will be built without such and Grants' are only to be used in making a few dishonest men wealtby, and to buy an election to office for a few political vagrants, who affiliate with everything but homes, ty and uprightness.

Last evening, we received information of the strivel at Washington of Ex-Sec'y Robinson and the restance of the restance of the latter of principle. A SPLENDID INVENTION.

One of the most triumphant and interesting experiments of this conting of labor-saving machinery cost place on Samuday a terroron it Green Point, in presence of a number of scientific and Point, in presence of a number of scientific and practical men a secretion for the purpose of witnessing n. It was the first public exhibition of the Timber bending machines on cred there in a large building just put up. From pre-Adamite times, the three of the forest, when healthy, has been upright, stately, strong, tohonding, to a proverb—"As unbending as the cale of the forest." This oak has so stood through the ages looking proudly down, but the proverb must now be remodeled. We saw on Saturday, the body of the same than the proverb must now be remodeled. be remodeled. We saw on Saturday, the body of more than one tree, shorn of its bark and planed to the shape of ship timber, taken out of a stran-furnace and carried a few feet ton machine, where in the space of five minutes, it was bent into the segment of a circle! This tremendous affort segment of a circle! 108 tremendous simple of power and ingenuity was received with loud applause by the company. All present most interested through their professions in the experiment—ship huilders and architects especially—were particularly delighted and ustounded at such were particularly delighted and astounded at such a crowning oridence of massive force and genia skill applied to one of the grandest agents of civilization—wood, which along with iron has most written out its history. Besides the ponderous beams bent for ships and steamers so that strength and grace may at one single blow form the swelling prow of the proudest craft, or bond in arched strength from the hights of hall or cathedral, or support its floor or roof, there were other proofs of the utility of the invention. The most inflexible wood—locust—was placed parallel with an iron machine and its stem grasp twisted into ellipses, the fibre becoming closer by the operation. The secret lies in the force applied to the ends of the timber, and thus the force and integrity of the timber, and thus the force and integrity of the timber, and thus the force and the cause of the timber, and thus the force and integrity of the timber is unimpaired.—N. Y. Tribune.

THE TROPHY OF THE TURE.—It appears, that when the renowned 'Fushiou' bear 'Bostom' on the Union Course, the saddle which 'Eclipse' wore in his great race with 'Henry,' was transferred to 'Fashion,' and still hangs in her stable. 'Eclipse' ran his four miles in seven minutes, 34 seconds: 'Fashion' ran the same distance in 7:32½. On the 8th of this month, 'Lecomde' ran four miles over the Metaire course in 7:26, winning \$10,000. He is a Louisiana horse, and the New Orleans Delfa says:

Lecomte must have the 'saddle, Louisiana and the South claim it for him. We must make it a State, a sectional question. Should the New braska Compromise over be cycked from the mass of bills under which it is now smothering, the South must include in her demands of the North a concession of the race trophy,—a peaceable and conteous transfer of Eclipse's saddle to him who has nobly won and will nobly wear it.

Gaam is Going Down.—Yes, grain is going down in many respects. It goes down the canals, both the Eric and the alimentary. It goes down though the hopper to be crushed; it goes down to the great markets; it goes down into the ground to germinate—and decay. It sometimes goes down in price. But the praceeds tend in the other direction. It sends the green blade from the earth, which brings forth thograin, some an hundred fold and some sixty. It gives strength to man and beast to hear up the burden of life. It sends up from the great market, gold, silver, rich goods, and luxuries. It brings up the filter, rich goods, and luxures. It brings up the arreats of the poor laborer and makes him rejoice

A FAT TAKE.—The last session of Legislature ordered the printing of the Documentary History, so far as completed, fixing the price per volume at \$1,30, and authorizing the Governor to fix the number. The number has been fixed at 5000. The work is to be in two volumes, which will make the whole numder 10,000 copies, which will make the whole numder 10,000 copies, which will the price will be \$13,000. "When our beloved 'cashier' went away, he said, 'boys, if you want any money, you must collect that due on the paper, as I have got only enough to take me to Philidelphia, and buy the city if I like it. Well, we did collect what we could. We have reised one-quarter, twenty-five c.nts, and two shillings, cash, money, gold, and silver, in one several piece, and this is all the money we have got, and we don't knew of another cent due this estublishment. We leave it to our readers to say how much this will do towards howing the 'clothes and victuals' fora large faveily, and keeping 'body and soul together' of two hungry devils, for two weeks. MoBridge's Point,—This beautiful point of land, comprising sixty four acres on the eastern shore of Fourth Lake, was yesterday sold at the office of Jaa. Richardson & Oo., for one hundred dollars per acre, (\$6,400,) being the highest price yet paid in Dane county for a tract so large. Acknowledged to be one of the most desirable, as well as prominent, of all our lake shore beauties, this purchase may be considered a good one, either as an incestment, or the better purpose, as a delightful residence for its new owner, Chauncey A. Hall Esq., of Northampton, Muss. We are informed that he intends to build upon it shortly, and make it his home. It is to be haped that the fine old wood with which it is surmounted, and which forms one of the most beautiful features of the scenery of Fourth Lake, may tiful features of the scenery of Fourth Lake, may be spared,—Madison Journal.

Grant Co. Republican, in order to correct misapprehensions which may arise from its statements. teron can have in misrepresenting the facts in the true, and some of them unjust and ungenerous: Southern Wisconsin and Milwaukee a Mississippi Railroads.

A. Hanhoad are at a great loss of a act point for the most profitable terminus of a Milroad from Milwaukee to the Mississippi River. A few years ago, the citizens of Potesi got the "latesi & Dodgeville R. R. Charter" granted by the Legislature, for the purpose of a read from this place to Dodgeville, where it was to jone with that coming from Milwaukee; but no round that there been nearly sufficient stock to the potential of the building of it, then our Eastern friends refused to make the connection, and determined upon anking some other point than this their terminus. (1) It would a few months since that the nearsy pers heralded, with no small display, that the contract had been taken for the forthwith completion of the M. & M. Raifrond from Madison to Proints du Chien; but now, it seems, the contractor has receded from his engagements—or clae there never were any. (2)

However, in the meantime, the citizens of Green, La Fayette and Grant Counties, wore determined upon having a rail road pass through we carther principal towns, enroute from Janesville to the Mississippi, and to this end had made sufficient has dway to guarranty the early building of the road, which was entitled the Southern Wissonsin'. Now, as will be seen from the notice of a meeting of the Directors, the M. & M. and S. W. Railroads have consolidated, so that only one of them will be built; where the Mississippi terminous of that will be, we don't know—or do we believe any one knows within twon—or do we believe any one knows within twon the cost profits.

Scizure of a Steamer..

The Canadian steamer Ottava, Capt. McGrath, entered our post yesterday morning, having on board some 80 tons railroad iron, from Prescott, Canada, for the La Crosse Railroad Co. She was found to have no manifest of her cargo whatever, and was seized by the Collector for violation of the U. S. laws. It is quite probable that the mat. ter will be arranged in some manner, as the Collector is disposed to be as leptent as possible, and has already allowed two or three vessels to escape he penalty, it being early in the season. But the aw and his duty are peremptory.

The law of March 2, 1799, sec. 23; directs that every vessel coming to an American part from a foreign port, shall have and produce an accurate, sworn manifest of her cargo at the port of entry

to proceed, after discharging the iron, it being part of along lot which the owners obtain to bondlere.

We understand that many of the captains of propellors and sail conf. complain of the cautes taken by our Collector, in requiring an account to the process of the process o

The Collector's duty is to know what is brought to or cleared from this part, and the most convenient way (for the vessels) for him to know it, is for them to furnish the information.

It is said that Collectors at other ports do not require these things, and judging from the fact that so many boats and vessels enter here without manifests, we think it quite probable. But this only shows that they and not our Collector, are doing wrong.

Annual Statements of Exports and Imports are required by Government, we believe, from the various districts; at all events, Government is constantly asking of the Collectors statistical information of the various ports. What sort o. an approach to accuracy does any one suppose the books of the Collectors around the Lakes would give, unless the laws above referred to are obeyed? The Buffalo Collector is very much to blame for the manner in which vessels are allowed to clear from that port. There is no trouble in obeying the law if all parties will but set abont it.

Milwaukee, May 4th. Burglary and Murder of a Police Of-

Numerous barglaries were committed in Newark and Zanesville, Ohio, last week, and a large amount of valuable goods carried off to a Railroad Station, 6 miles from Newark. Officers went to the station and seized the goods, arresting one of two suspicious characters. The other one lrew a revolver, and was allowed to pass through and out of the cars, while under way, and he escaped by springing off the cars when going at great speed, being considerably hmit. Officers went on his track next day, among there being a police officer of Columbus, named Beebe .--Jones, the escaped burglar, was found at the Sciota Honse, in Columbus, and presented a revolver, and threatened to put a ball through the heart of any man that laid hands on him. So saying, he made a run for the hall stairs, backing off all in his way, except officer Beebe, who resolutely sprang forward and caught the scoundrel by the skirts of his coat; Jones, without turning round, fired his revolver over his shoulder at his pursuer, and shot him, the ball entering the side of the head and ledging near the oppo-

About 2,000 persons proceeded to the deserted house of Robert J. Ward, Esq., and hung effigies of Mat. and Robt. in the portice. The windows were broken, the conservatory demolished, and the house set on fire. The fire department subdued the fire without much damage. The multitude then went to the house of Gen. Wolfe, and made demonstrations of violence, but finally dispersed without carrying them into effect.

Noble Butler, the brother of the deceased, addressed a circular to the people of Louisville, appealing to them by the most powerful considerations to abstain from violence in their demonstrations. The address met the hearty approbation of the community.

The father of the young lady who is alleged to have suffered such cruel treatment at the hands of her mother, is, from the necessity of his business, absent a greater part of his time, and is said to be ignorant of the facts as they exist, nor was any of his family cognizant of it, until a refuge was sought, at the house of the uncle alluded to.

The family has heretofore occupied a respectable position in society, and no suspicion was excited until the young lady was discovered manacled in her prison house. This course of treatment was pursued for some time before its discovery, but the excessive fear in which the victim was beld, prevented her from divulging it to any one, but the excessive fear in which the victim was beld, prevented her from divulging it to any one, lest, as she thought, her life might pay the forfeit of such disclosure. The whole facts in the case are said to be known to some who are high in authority in the clay, but as yet no legal steps have been taken leading to an investigation. It is said, however, that nothing will be done until the return of the father of the young lady, who is to be informed of all the facts connected with this recet areal and barbarous treatment towards his most cruel and barbarous treatment towards his laughter.—Bultimore American.

SPEECH OF MR. HUNT ON THE NEBRASEA BILL

Serven of Ma. Hunt on the Nebrasha Bril.

We are glad to observe that the speech of our Representative in Compress the Hoo. T. G. Hunt, in opposition to the Nebrasha bill, is receiving encomiumain every quarter. The Louisville (Ky.) Journal, which publishes the speech entire, says of it:

"It is truly a noble production, and richly deserves all the encomiums it has received. It is equally admirable for its ability, for its scrupting and forvid eloquence. Its influence upon southern sentiment cannot fail to be extensive and salutary. There can be no doubt, we think, that the Nebrasha bill is doomed. A few more sent manly and bigh-sculed efforts from the South as this of the eloquent and chivalrous Hunt will render its repose in the 'tomb of the Capillets' as sweet and aternal as the sleep of Juliet."

A Spirold Bars.—Mr. Jas. A. Baker has now on the stocks at his ship yard, at the foot of West First st., a magnificent vessel of the largest dimensions that can pass through the Welland Canal She is about 400 tons burden and measures 142 feet in length, 26 ft. breadth of beam, and 11 ft. hold; and will carry 16,000 bus, of wheat through the canal at the present depth of water. She is said to be the most perfect built vessel that has been launched in this city, having all the latest improvements, among which is what is called a "Boston steerer," and one of Talcott & Underhill's patent Mississippi Capstans. She belongs to our enterprising fellow citizen, H. C. Wright, Esq., and will probably be launched on Saturday, if the weather is fair. She is to be called the Great West.—Oscepo Pal.

can be little doubt that his sudden and mysterious death is to be attributed to the influence of rum.

We know little of the history of Mr. Weurman, but aside from his excessive and fatal use of intoxicating drinks, that little is in his favor. He was an excellent scholar, an accomplished linguist, and a beautiful penman. For many years he was the private secretary of Rev. Eleaze Williams; and here it is well known that to him the pretended Dauphin—who can retther speak fluently nor write correctly the mother tongue of the gay and brilliant nation over which he claims to have been born sorerign—is indebted for whatever literary reputation he has managed to obtain-abroad—at home he has none. Letters, referring to translations he was engaged in makwhatever interal replacements are managed to obtain-abroad—at home he has none. Letters, referring to translations he was engaged in making for Mr. Whiltams at the time they were written, werein the memorandum-book of the deceased, carefully folded up and preserved with other papers of utiling imperiance or interest. It is certainly a very suspicious circumstance, nevertheless it actually exists in the form of a stubborn fact, that the man who would so well like to be considered the deeply wronged but lineal inheritor of the splendid throne of St. Louis—on which his imperial ancestors at for a thousand successive years—the descendant of a hundred kings and as many Cesars—should owe most if not all his character for talent and learning to the genius and acquirements of the unfortunate and unknown foreigner whose remains stranger hands committed to a nameless grave last Sabbath afternoon, in the neglected cemetery dedicated to the wandering soldier's last repose, and whose melancholy end we have thus recorded. We saw on Saturday, the body of the to the hape of ship timber, taken out of a steam frinace and carried a few feet ton machine, where in the space of five minutes, it was bent into the sogment of a citele! This tremendous effort of power and ingenuity was received with loud applause by the company. All present most interested through their professions in the experiment—ship huilders and architects especially—were particularly delighted and astounded at such a crowning evidence of massive force and genia skill applied to one of the grandest agents of civilization—wood, which along with iron has most written out its history. Besides the panderous beams bent for ships and steamers so that strength and grace may at one stogle blow form the swelling prow of the prodest craft, or bend in arched strength from the hights of half or cathedral, or support its floor or nof, there were other process of the utility of the invention. Will had until of fute considered the days for selling and of course for buying Patent Medicines past, and that the new crain Medicine must greet the world's favered inhabitants. But we give it up, Dr. A. L. Adams' Liver Balsam is talked of more, used more and creating greater, sensation than any other Compound before the public, and should not this be the case! It is positively producing more cures than any other Medicine now extant. It is an ostensition fact that this Medicine is as good for what it claums as a Warrant.e.—and we are yet to learn of the first failure in what it claims to do. # Special Meeting of the Common Council.

A special meeting of the Common Council was called Wednesday for the purpose of reseinding a resolution passed July 28, 1853, empowering T.M. Knex to move two frame buildings to other lots owned by Amer; the lots from which the buildings were to be removed and the lots to which they were to be moved, all being within the fire limits. The resolution to rescind the former resolution was introduced by Alderman Geisberg and read by the clerk. Mr. Knox was granted leave to address the Council, and stated in substance that he was removing his buildings, in pursuance of the power given him by the council in its former resolution; that the buildings were now on the sidewalk of the lot to which he was removing them—that he could not help thinking it would be unjust for the Council to interpose now to prevent his placing the houses on the lots -that he had received no notice, and that he was acting in pursuance of an ordinance-that in 1847 he paid \$1000 for the buildings, the lease of the ground upon which they formerly stood had expired, and the lots to which he was removing them, were the only ones he had, and that it seemed to him that the city would be liable to him in damages if they prevented him from finselving the removel of the buildings.

Alderman Jenkins addressed the Council brief ly, saying that he thought Mr. Knex had rights in the matter; that leave was granted by the Council for the removal and that without opposition; the buildings were commenced in their removal and it was too late in the day to rescind the resolution; the effect of it would deprive him of a large amount of money, &c., Alderman Schutte thought the buildings should

bave been moved before. Mr. Steap, was permitted to address the Council, and spake to the effect that it would spoil the

Market House, if the buildings were placed on the lots to which they were being taken; and that it would prevent them from ever having a brick building, and alluded to its increasing the insurance rates &c.

The resolution was then put to the Council for a vote as follows :

Alderman Schutte then called the Ayes and Noes and the result was, Noes ; Mesrs. Coughlin Hadler, Houghton, Humphrey, Jenkins, Luding-ton and Mitchell (7.) Ayes Mesrs. Geisberg, Gas, Having Two Setts of Pine, Eiteer for Poney's or Large Balls. Hayden, Reed and Schutte, (4.)
